## General Assessment For Coleman, Blairmore and Improvement District

Coleman Council disposed of a great deal of business in a lengthy session last Tuesday night. To open the meeting Mayor Abousaffy clarified the budget for this year stating that the new schedule is the largest in history, even the figures are misleading. Last year council had a budget of \$38,000 but with a 10% discount which would give a true budget of around \$34,000. This year's budget is set at \$35,150.

Correspondence was received from assessor J. D'Appolonia stating that no provision was made for assessing those who conducted a business from their homes, people such as contractors, plumbers and insurance agents, who are in actual competition to other business men. The secretary informed council that notices had been sent these men last year with no response. Council felt that in all fairness this matter should be attended to and the letter was filed for the next assessor.

Council passed bylaw 267 to set the business tax at 39 mills and will forward it to the Minister for approval. Receiving their 3rd and final reading were bylaw 268 setting 39 mills levy on property; 269 setting aside \$100 as grants to charitable institutions and 370 amending the curfew bylaw.

J. Lombardi waited on council protesting the patrons of the

Roxy Theatre using his toilet facilities and asking that one Greyhound bus be allowed to stop in front of his business.

Council considered the matter of the Theatre and agreed that the matter of children running across the street was a danger. This matter is under investigation and a solution will be strived for. In regards bus parking, council decided that plans had called for getting busses of the street and that provision had been made for them at the new parking lot. Matters will remain as stand.

A letter was received from Padre Moss asking that top soil could be placed along the rock wall adjacent to St. Alban's church in order that a better floral display could be gained than was the case last year. Council okayed the request and went a step further in calling for top soil, flowers and shrubs to be placed along the retaining wall from the church east to the curve and down the hill into town.

A quotation was received from Ferguson Supply on a mixer. Council felt that a mixer was needed for cement and asphalt work, the Works and Property Committee authorized to look around for prices.

The Police report showed 119 complaints received and attended to covering, firecrackers, gambling, reckless driving, assaults, bi-

cycles, slingshots and air rifles. Out of this report the secretary was instructed to look into the matter of controlling the sales of fireworks.

A general assessment of property in L.D. 10, Coleman and Blairmore, will be conducted this year. To see that it is within an equitable basis a meeting between the interested parties will be held in Coleman, June 16.

The Institute of the Blind, and Salvation Army were given grants of \$20 and CARE, \$10.

Mayor Abousaffy reported on a meeting between himself, Councilor Ramsay and Mr. Harquail of Coleman Collieries. It was learned that agreements were made in regard lots leased to the town to extend the park boundaries and at the site of a building the town contemplates buying for a garage.

Councillor Jenkins reported for the Police Committee stating that they recommend the removal of the Freeway Bus stop to the parking lot leaving room for three cars in downtown parking, and the removal of one car still at the lot to give more room for parking three busses.

It was also decided to move the stop sign at Salus Store to the road approaching from the main highway and the location of permanent school slow signs at both schools.

### WORLD SERIES FILM

The Coleman Branch of the Canadian Legion have again been fortunate in obtaining a feature film for their Movie Nite showings.

The World Series Baseball 1953 film between the New York Yankees and the Brooklyn Dodgers will be shown in the Club rooms on Friday June 18 at 8 p.m. All members of the Legion and their friends are cordially invited to attend. All are welcome.

This film will conclude the current series of Movie Nites at the Legion until the fall series resumes.

### Dog With Taste

The young fellow walked into a clothing store and asked for a job. "Look," said the smart manager, "you can have a regular job here as soon as you sell this one suit."

The suit was really a dilly, light purple with white stripes and some red dots. But the applicant said:

"O.K. It's a deal."

About an hour later the manager saw him come running from the back booth, his pants torn, blood on his hands, and a woid look in his eye. But he panted out:

"I sold the suit."

"But you seem to have encountered quite a lot of customer resistance," the manager said.

"No, the customer was easy," the new clerk replied, "but I sure had a bad time with that seamy-eye dog!"

### Music Pupils Present Recital

The St. Paul's United Church was packed Thursday night when music lovers attended the piano and vocal recital presented by the pupils of Mrs. Ariene Hill L.R.S.M.

A vast wealth of musical talent was on display at the recital winning the unstinted praise of all in attendance.

Melody, Yuill—Geraldine Blanchin, Melody, Geraldine Blanchin, Hillcrest. Two Little Sparrows, Sharlet Dunford, Birdling's Serenade, Spencer Dunford, Ting-A-Ling, Connie Marconi, Merry Boblink, Lorna Richards, Shepherd's Son, Michael Wilton-Clarke. ### Large Meeting Gives Assent to Underwrite Coleman Rodeo?

The largest crowd ever to assemble at a Board of Trade meeting in recent years attended the Booster Committees meeting last week and gave assent to Coleman business houses underwriting the annual Coleman Rodeo.

J. R. Hill presided over the meeting and drew attention to the fact that Coleman Elks had taken a loss at the recent Bingo while other centers had come out on the red side of the ledger. The purpose of this meeting was to attempt to pin down the reason for the loss and the possibility that Bingo had lost its appeal before continuing with the Bingo planned for Rodeo time.

The topic was battled around, left and reappeared a number of times before being finally settled. In the end the chairman proposed a number of motions, calling for a vote on each one. As the result, a Bingo will be conducted on Rodeo night with a major prize of a cash jackpot in the neighborhood of \$500 to \$750, plus other prizes.

Going into Rodeo matters, Mayor Abousaffy stated that at the previous Board meeting a small attendance was noted. It was decided that if the town was ever in need of a boost it was now. In this light it was felt that we couldn't afford not to have a rodeo. Should the rodeo be dropped this year the psychology would tend to become more on the negative side, therefore we should try to boost our community. To do this a booster committee was appointed to see if enough money could be raised to promote the rodeo.

Rollie Ill followed the Mayor's remarks with an explanation of what steps had been taken. Following the last meeting, the committee approached Coleman Collieries and were assured of support. Other firms deriving benefits out of dealings in Coleman had also been approached. Mr. Hill pointed out at this point that those assembled were representative of the whole town and benefit is some measure. It was proposed that a canvass be made of the business sections asking that they guarantee that the project would not go in the hole. The plan was not for an outright donation, but more of a guarantee to underwrite the Rodeo in the event of a loss.

From this point it was evident that most in attendance would meet the proposition when called upon by the canvassers and dis-

cession then following the line of regular Rodeo matters, store closing, parade time and entertainment on the field. More details will be given on these matters as plans are formulated.

### Cadet Inspection

The annual inspection of 2406 Bellevue-Hillcrest Cadet Corps was held at Hillcrest June 2, with 300 to 400 people present.

The Inspection Party included Col. Tennant, O.C. Calgary Highlanders, Capt. P. Fry, and Capt. Cameron, R.G. Edmonton, Rest. Cadet Training Officer, (South) W.P. H. Brown, W. R. ROEME (R.O.) Sgt. Stanley W. Hastings Regt. Western Command I&A Cadre (Cdts).

Corp Instructors: WO II Brown, W.R. Chief Instructor, Cpl. Squarck, J. Instructor, Mrs. P. Waytula, P.A. Instructors.

Cadet Officers, NCO's on Parade: C/Lt. MacDonald, R.C. Officer in charge of Parade, C/Lt. Mikusek, M. Platoon Commander Cadettes, C/Sgt. Fisher, R. Platoon Sgt. Cadets, C/Sgt. Craig, V. Platoon Sgt. Cadettes.

Programme:

General Salute, Inspection March past in Column, March past in Column of Route, Advance in Review Order.

Presentations:

Best Cadet of the Year, Moose Trophy, C/Cpl. Grant, D. Hillcrest. Best Shot, M.J. John Campbell Trophy, Cdt. Brown, A. J. Hillcrest. Runner up Annual Shoot, Cdt. Squarck, J. Bren, C/Cpl. McIntyre, R. Rifle: Cdt. Renyk, E. No. 36 Grenade Cdt. Brown, A. J.

### Gun Club News

Sunday, June 6th, the Crow's Nest Pass Rifle and Gun Club held its second shoot of the season. There was a good turnout even though it was cold and threatening to rain. High man for the day was Carl Schultz of Blairmore with a score of 23 out of 25. A new member, for the first time turned in a terrific score of 15 out of 25.

The next shoot will be held on June 27th with a ham shoot being planned in the near future.

● CANADA'S DIXIELAND KING — The fact that "Trump" Davidson doesn't play a trumpet at all will surprise a good many people. Actually he blows a cornet, which is similar in shape to a trumpet, but has a different bore, and results in a slightly different tone. The erroneous nickname attached itself to Davidson over 20 years ago, through a friend who didn't know the difference between the two instruments, and "Trump" is just as glad he didn't. Davidson has been leading his own dance orchestra since 1937 and has always favored the band within a band, the Dixieland Sextet. "There's nothing like that good old two-beat Dixieland to set your feet a-jogging," says Davidson, and thousands across Canada agree. His great group can be heard on "Dixieland Concert", a weekly feature on the CBC.

During recent weeks a moose has been seen in the area around the Blairmore Ski Hill and Lyons Creek. Edmond Drain and Chuckie Olson were playing around the ski hill last week when they noticed a baby calf, estimated to be about 10 days old. As the mother was nowhere around, the boys wrapped a jacket around its neck and led it back into town.

Following a few hours of playing with the calf, the boys were advised by local authorities to return the moose to the spot where they found—which they did.

A bear has also been noticed rummaging around the Blairmore dump recently.

## Vacancy On Blairmore School Board Announced

Councillor Tiberg reported the electrical program underway in Blairmore, showing the progress in re-wiring and system improvements at the regular meeting of the Blairmore Council last week.

Councillor Tom Gibos was the second councillor to report to the meeting, telling council of the C. D. school attended by Henry Aschaker and himself at Lethbridge, both receiving certificates as fire-fighters, while Mr. Gibos had the honor of placing second in the class.

Road and street work came under considerable consideration, with council ordering 59 barrels of asphalt and discussed the possibility of spraying the side roads to cut down the dust nuisance.

A vacancy on the School Board was reported as the result of M. Pagnucco leaving to reside at Windsor. C. M. Labalester was appointed Returning Officer and instructed to call for nominations.

Permission was granted the Blairmore Elks to demolish the building known as the Chinese Mission, the group wanting the lot as a parking lot.

Complaints have been received regarding children riding bicycles at night without reflectors. The matter to be referred to the police chief. School Board chairman, J. Anderson had requested that the council consider constructing a bicycle path from the west end school to town, many children riding bicycles having to cope with the heavy traffic on the road.

This matter was left in abeyance.

### Blairmore Students Prepare For Prom

Students of Blairmore High School have been busy with preparations for their annual prom and show their usual fine taste in preparation of invitations, programs and place cards. The annual event is scheduled for Turtle Mountain Playgrounds on Wednesday June 30th.

Graduating this year are: Annette Bias, Alhina Galvon, Frances McKay, Patsy McRae, Sally Naslund, Ethel Oiles, Peggy Price, Margaret Vejprava, King Emmerson, Robert Gagne, Robert, Kropink, John Mikusek and Ken Sumank.

### T. M. Sportsmen Elect Officers

At a recent meeting of the Turtle Mountain Fish & Game Association, held in the Frank Community all, the following officers were elected for the 1954 season:

F. Edl, president.  
J. Rybak, vice-president.  
L. Ennis, secretary.  
W. Milburn, treasurer.  
E. Edl, J. Fauville, R. Stewart, B. Fauville, F. Painter, E. Goulding, executive members.

It was decided at the meeting that a contest will be held for the biggest rainbow, bulltrout, grayling or lake trout each month for the months of June, July, August and September. Prizes will be awarded at the end of the season and the weighing station will be at the Turtle Mountain Playgrounds.

### Army Convoy Passes Through

An army convoy of 70 vehicles passed through Coleman Thursday enroute from Vancouver to Wainwright.

The radio controlled convoy travelled about 100 miles per day, the troops pitching camp at night. The convoy was complete including ambulance.

### Mr. and Mrs. Vincent To Reside in Calgary

Mr. and Mrs. H. Vincent have taken up residence in Calgary following many years of residence in Coleman during which time they have made a host of friends.

Born at smilton, Ont., Mr. Vincent was employed at the International mine here and a member of the I.O.O.F. Lodge and the United Church. Mrs. Vincent was born and educated in England and while here was a member of the K.P. Lodge and United Church. They have one son Roy now serving with the navy at the west coast.

### Blairmore Lions Elect Officers

Blairmore Lions held their election of officers recently with John Goddard taking over as president. Other officers elected were:

Sec. Rollie Stewart; Treas. Owen Bradwell; 1st Vice, Clifford Gilbert; 2nd Vice, Frank Leavitt; 3rd Vice, Bert Fowler; Lion Tamer, Edward Picard; Tail Twister, Dr. Al Gray; 2 yr. Directors: Malcolm Dunn and Dino Pagnucco; 1 yr. Directors: Ron Johnston and Don Thornton.

## Will Begin Lime Works Negotiations

Company and union negotiators were scheduled to begin discussions Thursday afternoon in Lethbridge on the first contract between the newly-certified Local 306 of the Canadian Union of Lime Product Workers (CCL) and Summit Lime Works Ltd. of Lethbridge.

The union, certified on April 26

this year, claims a membership of about 35 employees at the company's Coleman plant, Jack Evans of Calgary, Canadian Congress of Labor general representative for Alberta, said Thursday.

Mr. Evans said the union would seek a one-year contract covering wage increases, two-week annual vacations, eight statutory holidays a year, a union shop clause and a leave of absence clause.

## Bellevue Lions Conduct March Of Pennies

Crow's Nest Pass Municipal Hospital will be the beneficiary of the Bellevue Lions Club's latest project.

At a recent meeting, the Lions decided to conduct a March of Pennies program with an objective of collecting 25,000 pennies to be used to install driveway lights at the hospital.

A committee was formed under the chairmanship of Charles Ritchie and a canvass of Bellevue will be made immediately. Collection tins will be placed throughout The Pass towns.

Supporting home projects is not the ultimate, it is merely the start. With diminishing payrolls and a country-wide recession it is more important that we shop at home and support our neighbors.

Shopping out of town is more foolhardy than it is disloyal. Take, for instance, the effect that it has upon the town as a whole. Every cent that is spent out of town is spent at the expense of yourself. Money needed for expansion of your business section and improvement of service and selection is usually that extra that is spent out of town.

Travelling people swamp the consumers with fruit and vegetables during the summer months making it unprofitable for the local merchant to handle these lines; yet in the winter we expect these same merchants to supply us with these items when the margin of profit is less and the chance of loss higher.

The next time a peddler calls at your door, check to see if everything is as sanitary and clean as at your neighboring groceries... ask if his scales are government tested as is the case with the grocer, then ask yourself if the dollar you plan on spending could be better used right here in Coleman rather than in a farming community miles away.

Let's build our town, not someone else's.

Lack of local support at Saturday night's Bingo resulted in the Elks taking a financial shellacking and the Board of Trade thrown into tizzy. Of still greater importance, it set Coleman back another step in its fight to go ahead as a strong and active community.

Some may wonder how non-support of Bingo locally might affect the town. These people need only check back and recall the \$1250 spent by Coleman Elks on the municipal hospital, the help to needy families and Christmas hampers sent by the Elks and those who have received specialized treatment just because the Elks had a fund for that purpose.

All these mentioned are in the past. What about the future?

Coleman has taken a tremendous licking in money spent and facilities lost ever since the Miners' Hall burnt down in 1948. Since that time dramas have been homeless and travelling shows or local projects forced to operate in a neighboring town.

Coleman Elks are working hard to give the people of Coleman the answer to this with their new Elks' Hall. This hall was depending upon the Bingos to take part of the strain, yet the Bingo itself took a shellacking.

We grant the statements that it's a better gamble to play for a car, even though it means building another community, not our own. However, we do feel that it's a better gamble to support the home town project. If they succeed and Coleman receives a shot in the arm, we all win.

The editor was asked last week as to who wrote the editorial regarding the Board of Trade devoting practically each meeting in its entirety to the annual rodeo.

To clarify this matter we point out that each and every editorial that has appeared in The Journal was written by the editor, unless that editorial carried a credit line or stated that it was a guest editorial. We realize that many do not agree with the editorial, but that still a great many do. The editorial was written after discussion with a great many people representing a cross-section of the town.

Every once in a while a representative of a paper is asked to omit or shade a certain portion of a meeting. This request is granted at times when the matter under discussion is in the formative stage and full details in the paper at the time is premature.

However, these requests soon become too numerous and if they are honored the paper loses its true meaning.

An honest paper cannot skip over the truth or report known half truths to suit a special person or association and still serve its readers. If and when a paper is prevented reporting a meeting as it happened then the representative might just as well remain at home and print publicity hand-outs from the secretary or group officers.

The Journal believes as strongly as anyone in the need of good publicity for our town, but we believe first in serving our readers with what they have paid for—the news as it happens.

## Polio Cure

VANCOUVER, B. C. (CP)—The chiropractic profession has found the cause of polio... "and we have the cure," Dr. E. R. Dunn said here Thursday night.

Dr. Dunn of the Dunn Polio Clinic, Oklahoma City, Okla., made the statement to the Western Canadian Chiropractic convention here.

The cure, he said, lay in chiropractic treatment. He described one girl at his clinic walked 30 minutes after certain massage techniques had been employed.

He said a five-day cure was possible if polio was discovered within three days of contact and cited fatigue, injuries and tension as the main causes. The disease is more prevalent during hot weather, he said, because during the summer months there are no enforced rest periods such as children get at school during the winter.

## Explanation Of Principals Of Chiropractic

By W. Brook, D.C.

There is nothing moveable on earth that does not require some form of power to move it. The finest built car requires gasoline. A steam engine needs steam, an electric motor will not run without electricity, etc.

The human machine is no exception. But, here we have a very different kind of power to deal with, generally spoken of as "Nerve power", Nerve impulses.

etc. Lacking nerve power we would be in a state of total paralysis.

The Chiropractic profession prefer to call this power "Innate Intelligence", because, we know it to be an intelligent force. Any other known earthly power can perform but a single function. Nerve force carries on hundreds of functions in the body. It runs the heart — normally — at 72 beats per minute. It makes the liver function and secrete bile. It causes the kidneys to secrete urine. It carries on the function of digestion in the stomach. It enables you to see, hear, smell, taste and feel. It carries on the function of reproduction, assimilation, growth, excretion, and hundreds of other bodily functions. A nice example is the function of healing. Break a bone, and innate intelligence sends out messages to the corpuscles in the blood, and they at once begin gathering loads of the necessary ingredients, carrying it to the break and plastering it on until the break is mended.

We Chiropractors believe that this intelligent force reside in the brain, and sends out nerve impulses down the spinal cord, and out over the millions of nerve fibers that supply every last part of the body. If the nerve to the heart were cut, the heart would stop instantly. If the nerve to the kidneys were cut the kidneys would cease to secrete urine, and so on all the way down the line.

We believe that if there was an obstruction to the flow of nerve force to any organ of the body, the result would be disease of that organ. We believe that the only

place that obstruction can occur is to the nerve trunks where they make their exit from the spinal cord through openings between the vertebrae, known as "Intervertebral Foramina." When a vertebra becomes displaced—subluxated—it impinges the nerve trunk, thereby obstructing the flow of nerve energy to what ever organ, or organs that nerve supplies, and the result is disease.

The Chiropractors job is to seek out that displaced vertebra, and adjust it to its normal position, relieving the pressure on the nerve, allowing nerve energy to get through one hundred percent to the diseased organ, and thereby restoring health. We work hand in hand with nature.

One difficulty we have, is to get our patient to continue treatments long enough to properly overcome the condition. When a vertebra has been displaced for some time, the surrounding soft tissues become changed in size

## Coleman Elks' First Bingo Poorly Attended

Coleman Elks first Bingo of the summer season failed to draw support, but was enjoyed by all in attendance.

Winners of the various prizes were:

1. Nest of tables, Mrs. E. Raymond, Coleman, Alta.
2. Mix-master Sunbeam, Mr. Joe Vhren, Blairmore.
3. Lamp and ashtray, Miss Virginia Peknik, Town.
4. Silverware, Rex King, Vancouver.
5. Travel Guard, Mrs. E. Rajek, Blairmore.
6. Rug, Alora Kryvot, Coleman.
7. 100 gal. Gasoline, Mr. J. F. Lote, Blairmore.
8. Bicycle, Minnie La Croix, Town.
9. \$50.00 Groceries, Mrs. Aline Ford, Town.
10. Suit, John Bartelli, Sentinel.
11. Bedroom assembly, Buck Eysackers, Town.
12. Refrigerator, Philco, Ozzie Lemke, Vancouver.

Door-Prizes: Tony Servello, Fernie, B.C. A. DeLuca, Town, Jim Urua, Blairmore, J. C. Lote, Blairmore.

Consolation winner Mrs. Lil Kuteler, Frank.

## Personalities IN THE NEWS

Garry Townsend is a patient in rheumatic fever. Garry is one of the carrier boys for the Coleman Journal.

Mr. W. Purvis is a business visitor at Vancouver.

Mr. and Mrs. Alf Destobel, of Vancouver are visiting friends in Coleman.

Mrs. Marchuk is convalescing at home having been a patient for several weeks in the local hospital.

Mr. W. Maxwell suffered face incising him to have several juries while at work last week, stitches.

Mr. W. Wilson suffered an eye injury at work last week. It appears that Mr. Wilson's partner was hammering a nail, the nail flying out and striking his eye.

Mr. K. Blain of Kimberley visited with Mr. and Mrs. J. Nash last week.

The Women's Ass. of St. Albans Church met at the home of Miss Myrtle Johnson for their last meeting, before summer recess. The talent money made by the various members was totalled and found to have been a very worthwhile undertaking. A gift of silver and china was made to Miss Johnson, who is being married in the near future, was made by Mrs. Kory Panek, on behalf of the W.A. Ladies. Expressing their very best wishes for happiness and success, in her new life. A delicious lunch was served by the hostess and a very pleasant evening was enjoyed by all.

Sgt. J. T. Punfer, stationed with the Canadian Army at Churchill, Man., arrived in Bellevue this week to spend a one-month furlough visiting at the home of his mother, Mrs. Punfer of Bellevue. Sgt. Punfer has served with the army for the past 13 years.

Mrs. K. Panek has returned from a holiday spent at Kilmat and Vancouver.

Eddy Ledieu has returned to Coleman, employed at the C.P.R. station. Jerry Lonsbury has also joined the railways staff as telegraph delivery boy.

A meeting of the Board of Stewards was held at St. Paul's United church last week when it was decided to present Rev. Haythorne of Blaimore with a purse of money and a letter of appreciation for his services. Mrs. McKinnon and Mrs. MacQuarrie were chosen as a committee to purchase a suitable gift for Miss Kay Hurlburt.

Dick Shone was a recent Edmonton Visitor.

Town work crews were busy last week repairing some of the low spots around town, spots that have always served as basins for rain and runoff.

Miss Kay Leisemer left last week for Calgary where she will be employed at the Film Exchange.

Miss Elsie Sikora left last week to spend the summer working at a Dude Ranch at Seebe.

PProspective track stars from grades 7, 8, 10 and 11 met with Mr. Allen and Mr. Spillers last week to discuss the possibility of

bringing track events back on the local sports calendar. It was learned that Trevor Collister was willing to handle the chore. Trev a track fan while in his native Australia. A second meeting was held on Monday.

The Tyro Boys Group of St. Paul's United Church will hold a candy and Pot Holder Sale in conjunction with the Strawberry Tea Sat. June 19.

Dr. Bryant and family are spending three weeks holiday at the west coast during which time Mr. Bryant will write his B.C. Exams.

Coleman Lodge O.O.R.P. No. 96 the C.N.P. hospital suffering from recently passed hostess to members from Granum Lodge No. 24. For Macleod No. 28 and Blaimore No. 159, who attended the first annual meeting in District No. 7, held in the Union Hall. Deputy Supreme Honored Royal Lady Wilson, of Coleman, officiated at the meeting. Among those present were D.D.S.H.R.L.'s Oberon, of Lethbridge Lady McDonald, For Macleod and numerous Honored Royal Ladies and Past Honored Royal Ladies of the various lodges. During the evening questions were asked and history books judged. Each lodge presented some part of the ritualistic week, which was well done. One hundred and twenty ladies attended and following the successful meeting, enjoyed a banquet in the United Church Club Rooms.

Miss Carrie Harrison, RN, of the Calgary General Hospital, is spending a short holiday visiting at the home of her parents, Mr. and Mrs. Tom Williams Sr. of Blaimore.

Mr. and Mrs. Angus Chala of Lethbridge, were visitors at the home of Mrs. A. Chala in Blaimore over the week-end.

Mrs. J. Kanik of Blaimore, has returned after spending an extended holiday at the home of her

son and daughter-in-law and children at the West Coast.

Mr. PPaul Macbuchi is a patient in C.N.P. hospital.

## LOCALS

Mr. and Mrs. Carl Trentini and son Walter of Bellevue, left this week to visit at the West Coast and Vancouver. They were accompanied by Miss Marie Youngberg of Ilwaco, nurse-in-training from the Galt Hospital in Lethbridge, who is on holiday.

Mrs. Robert Laithwaite and baby daughter visited her parents Mr. and Mrs. Arestonia. Also Mr. and Mrs. J. Goldring recently left by plane for Peach River where Mr. Laithwaite is employed.

Mr. and Mrs. J. Lepacek have

as their guest Mrs. Maryam Rehak from Illinois, U.S.A., Mr. Lepacek's niece.

Mr. Julius Varietta from Calgary spent the week-end with his parents.

Mr. Alex Cornett from Calgary spent week-end with his parents here.

Excitement galore is in store for local music lovers next on Friday, June 18, when Paul Norrbäck who holds distinction of being Finland's leading concert artist number one accordionist and top juke box personality,

Blairstown, Elks Hall.

Accordion concerts are strictly rarities in the United States and strangely enough, the few such tours this country has seen were made by Scandinavians and Finns. Though only 23 years old now, Norrbäck made a brief but successful tour in 1949 which terminated when he had to return to his native Finland to serve in the army. Norrbäck does all his own arranging and the audience of June 18th will hear his wonderful renditions of Chopin, Mendelssohn, Grieg, Bach, Mozart, Sarasate, Liszt, Smetana, Debussy, Brahms and of course his immortal countryman, Sibelius.

Canadians used to jazz, wheezy "Gypsy" tunes and hill-billy folk songs as played by our native accordionists, are in for a musical revelation when they hear Norrbäck play. He is an accomplished musician and composer, a graduate of the Vasa Conservatory and Sibelius Academy and Helsinki where he studied theory and piano and his amazing technique which won him acclaim in Europe, is winning a permanent place for the accordion in the American and Canadian concert world.

Norrbäck has appeared as soloist with all of Finland's leading symphonies and has been heard throughout Europe as a popular radio artist. He has recorded under Decca, Rythm and Canadian Pennia labels and his platters are the top favorites in America's radio programme.

Incidentally, his musical background goes back four generations—through his father, grandfather and great-grandfather, all of whom were accomplished musicians and composers. Tickets are on sale at Alice Bucha's Music Studios.

## Report of The Research Council On Coal

The currently severe, and undoubtedly continuing, competition against coal by oil and natural gas has, in the past few years, brought about a significant shift of emphasis in modern coal research. While it is accepted that coal will remain a valuable primary fuel and an important source of energy, it is recognized that research on coal must not merely attempt to develop more efficient and attractive means for its traditional uses, but that it must also endeavor to find new applications. Apart, then, from a

continuous re-examination of established processes in the light of improved fundamental knowledge, the general coal research pattern tends to depote progressively more attention to the chemical potentialities of coal.

In keeping with these trends, and convinced that such reorientation of coal research is justified both by the present status of the coal industry and by the unquestionable potential importance of coal within the framework of the national economy, the Research Council of Alberta formulated, towards the end of 1952, three broad research programs which were to concern themselves with:

1. a paleobotanical study of the flora and biological origin of Alberta coal measures;

2. investigations into the chemical and colloid structure of coals; and

3. exploration of possible new chemical uses for coal.

To implement these plans, Council reinforced the coal research staff available in 1952 by one physical chemist, two organic chemists and one paleobotanist (all at Doctorate level), and devoted considerable effort towards establishing and suitably equipping the necessary laboratory space.

At the same time, however, Council remained cognizant of the importance of other aspects of an overall coal research program. The routine analytical and applied researches carried out during 1952 were, accordingly, maintained (and expanded where necessary), and though one project (that concerned with cleaning of fine coal) had to be curtailed owing to staff changes, satisfactory progress generally can be recorded.

Throughout the year under review, the Coal Research Laboratory continued its practice of undertaking complete analyses upon channel samples taken from newly-opened Alberta mines and from established mines in which operations have entered a new and hitherto uncharted working area. Such samples are collected and submitted to Council by courtesy of officials of the Mines Branch, provincial Department of Mines and Minerals, and analytical data relating to them have proved invaluable in enabling Council to work towards a comprehensive catalogue of Alberta coals and in providing (through Council) potential coal consumers with practical information as regard rank, type and properties of Alberta coals entering the market.

Concurrently with these analyses, a number of coal samples received from the Department of National Defence, were tested in order to check the quality of solid fuels purchased for Army, Navy and Air Force installations. In addition, analyses were made of materials submitted to the Coal Laboratory by other departments of Council, and a considerable amount of work was also expended upon efforts to adapt a Scholes calorimeter bomb for the determination of sulphur in oils. The results of this latter investigation, however, are regarded as unsatisfactory.

Determination of Volatile Matter in Coal

A part of its program of analytical investigation, the Research Council of Alberta designed and built, in 1929, a vertical electric tube furnace for the determination of volatile matter contents of coal. This furnace, which was considered to offer certain advantages over those used in other laboratories, was redesigned in 1953 and used for a systematic study of the factors influencing reproducibility of results relating to the volatile content of low-rank coals; this aspect still presents a difficult problem. In its current form, the new furnace permits a substantially easier operation, but some difficulty has been encountered in maintaining constant tube temperature throughout the day; the variability is thought to be due to voltage fluctuations in the main power supply and can probably be corrected by the incorporation of a voltage stabilizer or suitable high-temperature thermostat. In the meantime, however, evidence has been obtained to show that "sparking", i.e., ejection of coal particles from the containing crucible during the rapid heat-up (a characteristic difficulty experienced with low-rank coals), can be greatly reduced, and in some cases completely suppressed, by increasing the moisture content of the charged coal. Other factors now known to influence reproducibility are:

(a) the size and composition of the crucible,

(b) the rate at which the crucible is elevated into the furnace, (c) the rank of coal, and (d) the size consist of the charged coal.

It is, accordingly, planned to continue current studies in this field and to extend measurements to a series of typical Alberta coals recently secured through the courtesy of the Mines Branch, Department of Mines and Minerals. When the projected investigations are completed, it is Council's intention to submit a full report upon them for consideration by the American Society for Testing Materials and the International Standards Association. These two bodies are currently studying possible standard procedures for the

During 1952, a 14-inch rotating, self-cleaning grate, domestic stoker and ancillary control and recording equipment were installed in Council's laboratories in order to permit an evaluation of the combustion characteristics of typical Alberta coals under practical conditions. This program has been continued in 1953 and has now been completed. In all, 18 tests with a series of seven coals were carried out: of the coals, two were classed as subbituminous B, three were subbituminous B, one was high-volatile C bituminous, and one was medium-volatile bituminous (of ASTM classification). The test procedures were those indicated in the Annual Report for 1952.

The results show that all test coals except that of highest rank, i.e., the medium-volatile bituminous coal, will give satisfactory performance in the stoker. However, two minor limitations were noted: at feed rates corresponding to theoretical heat inputs exceeding about 150,000 B.t.u./hr., a slight but definite decrease in combustion efficiency was found, and a similar decrease was observed when the size of coal was reduced from 1 1/4 x 1/8-inch nominal stoker size to minus 1/2-inch. It is, therefore, considered that the usefulness of the 14-inch stoker would be confined to small and medium size family dwellings; for larger installations, efficient operation would demand a proportionately larger stoker and furnace.

Coal Cleaning

Owing to staff changes, Council's investigations of fine-coal cleaning by means of a Driessen cyclone had to be discontinued in June 1953. Prior to this, however, considerable progress had been made along the lines indicated in the Annual Report for 1952. The feasibility of using a coal-water slurry of suitable concentration as the separation medium was confirmed, and it was demonstrated that cleaning efficiencies in this medium can, under appropriate operating conditions, closely approach the theoretical values. A paper reporting experimental data so far available was read at the Annual Convention of the CIMM, held in Edmonton in April 1953.

It is now proposed to reopen the investigation on a laboratory scale, and to examine in greater detail the effects of cyclone shape and dimensions. While the geometry of the Driessen cyclone is known to have a pronounced influence upon cleaning efficiencies, quantitative information on this point is still sparse, and it is felt that no hard and fast conclusions about the cyclone's applicability and efficiency are possible before this gap in present knowledge has been filled. At the same time, it is intended to investigate the properties of dense media other than magnetic or coal slurry.

Water-Retention Studies

In 1951, Council commenced a study of water retention by coal in order to obtain information about moisture sorption during wet cleaning, the effect of surface and interstitial water on storage and handling properties of coal at temperatures below 32 deg. F., and the relative efficiencies of additives capable of significantly reducing the amount of adhering water. This investigation was continued throughout 1952 and finally completed in the summer of 1953; the results have been reported in an M.Sc. thesis to the University of Alberta.

Broadly speaking, it was established that whilst the amount of interstitial moisture taken up by any one coal, when immersed in water, can be predicted by means of a capillarity equation, interstitial moisture is normally very small compared to the quality of water held superficially on the coal. This surface moisture can be reduced by oil-treatment of the coal, but the amount of oil required for a given reduction depends critically upon the specific

surface area of the coal, and the oil-treatment would, therefore, not be practical in the case of very fine coal unless great importance is attached to simultaneous dust- and freeze-proofing. There is, moreover, an indication that the efficacy of the oil-treatment decreases with time owing to evaporation of lighter oil fractions from the protective film.

On the other hand, oil-treatment does improve handling characteristics of coal at temperatures below freezing point, and this (coupled with the reduction in surface moisture which it produces) may under certain conditions justify the process.

It was also shown that untreated frozen coal attains a maximum strength as the temperature falls, and that the temperature at which this is reached varies with the size consist of the coal: in general, the finer the coal, the lower the temperature. Equations connecting the freeing strength with temperature and size have been developed, but these apply only to closely-sized coal and are, therefore, of limited usefulness.

Briquetting

Owing to limitations imposed upon Council by its present inadequate accommodation, the practical coal-briquetting and coal-balling programs, referred to in the Annual Report for 1951, have remained in abeyance. In fact, with most of the required laboratory-scale work already completed in earlier years, these programs are likely to be resumed only when satisfactory pilot-plant space becomes available. Nevertheless, it has been possible to undertake some work bearing upon the fundamentals of briquetting: a theoretical study of the basic variables involved in briquetting with and without binders has led to a paper contributed to the Third Biennial Briquetting Conference held at Bauff, Alberta, on August 31-September 2, 1953, and a second paper, dealing with laboratory investigations concerning determination of volatile matter, from coal briquettes, has been particularly of low-rank coals, published in "Brennstoff-Chemie." These publications, when viewed in the light of results obtained in connection with a study of the colloid properties of selected Alberta coals, have thrown up several important aspects of briquetting that do not appear to have been investigated hitherto. It is, accordingly, Council's intention to explore them as soon as the staff and laboratory-space situations improve. Among them are, first, the possibility of extending the range of coals suitable for binderless briquetting by a pre-sintering treatment and, secondly, a study of the fundamental relations between coal and binders.

Coal Constitution

As mentioned before, Council's studies of coal constitution were systematized towards the end of 1952 by the creation of the specialized research team. Since three out of the four members of this team did not take up their duties until the summer of 1953, little more than preparatory work could be undertaken so far, but some of this merits recording.

Continued next week

DON WRIGHT

Working on one of his famous arrangements for his popular chorus is Don Wright, his wife Lillian, who produces the Thursday night program on the Trans-Canada network, looks on approvingly. The Don Wright Chorus of 7 women and 7 men is an "amateur" group—but only in the sense that none of them earn their living completely from singing. In the seven years they have been entertaining listeners from coast to coast with their imaginative renditions of popular tunes and light classics, they have set a level of entertainment that is well above "professional" standards.

**New Type Locomotive  
May Beat Diesels**

PHILADELPHIA (NANA) — Big ugly No. 2300 rolled out of the Eddystone locomotive works of the Baldwin-Lima-Hamilton Corp. recently—two years behind schedule.

No. 2300 is a locomotive — the world's biggest. It's also a prototype — a costly experimental model — that could bring steam back to dieselized railroads.

The long, black, box-shaped engine will be tested on the tracks of the coal-carrying Norfolk and Western Railway. The N. and W. runs from Tidewater, Virginia up into the mountains of West Virginia and out to Ohio.

The railroad, extraordinary today because it is entirely powered by steam, ordered the experimental giant way back in 1949.

The order was placed because the N. and W. — the second largest coal carrier in the U.S. (Chesapeake and Ohio is No. 1) — didn't want to bite the hand that feeds it. The railroad wanted more efficient and economical locomotives—but it wanted to burn coal.

Experts told officials of the road that the conventional steam engine just can't be improved. So what was needed was an entirely new kind of steam locomotive.

That's what "the giant" is. The locomotive was the joint effort of four companies: Baldwin, Westinghouse Electric Corp., Babcock and Wilcox Co. and the N. and W.

In essence, No. 2300 is a coal-fired electric plant compressed to railroad-track size.

Coal is automatically stoked into a firebox and burned in a sliding grate, at a temperature of 900 degrees Fahrenheit. The Babcock and Wilcox water tube boiler produces steam at a pressure of 600 pounds per square inch, about double that of the conventional locomotive boiler.

The steam is used to power the Westinghouse turbine, which was designed and built in Philadelphia. The steam turbine drives two generators, which produce the electricity to run the motors on the axles.

This complicated system takes up a huge amount of room. That's why the giant is the world's biggest locomotive.

The N. and W. is the first to agree that the giant may be an expensive flop. Similar efforts have been made in the past and all have ended in failure, one way or another.

Cautionously, the N. and W. said: "The 2300 has undergone a succession of stationary and yard tests (at Eddystone) which indicate it may fill specifications."

**20 More Streams  
Closed To Anglers**

More than 20 former fishing centres have been classified as closed streams, a statement from the office of the Department of Lands and Forests stated Monday.

These streams are located south of Calgary to the U.S. border, and southwest to the British Columbia line.

Areas designated in the report include the Castle river, north of Waterton Lake, some streams around Coleman, and the Livingstone river near Crow's Nest.

However, as these streams must be closed for the 1954 season, is in no way diminishes possibilities for anglers, as officials pointed out several choice locations with the "open" sign on them.

Ghost river, Belly river, Oldman river, streams around Nanton, Vulcan and Claresholm, are all open spots this year. In addition, the St. Mary river is open to fishermen at the southern provincial boundary, and Racehorse creek is also available, in the Crow's Nest area.

**Cominco Announces  
Senior Appointments**

Three senior appointments in the Engineering Division of The Consolidated Mining and Smelting Company have been announced by R. D. Perry, General Manager. L. Williams has been named to the post of Superintendent of Development, Engineering Division. E. H. Gautschi succeeds him as Superintendent of Engineering Trades, and L. S. Piper becomes Superintendent of Engineering Services. Mr. Gautschi's former post. The appointments will be effective June 1.

Mr. Williams was born in Asbestos, Quebec. In 1932 he obtained his B.A.Sc. in electrical engineering at the University of British Columbia. His start with Cominco was in 1934 as a Smoke

Tester. Between 1935 and 1940 Mr. Williams did research work in the Instrument Department and then was transferred to Calgary. He completed his service with Cominco's Alberta Nitrogen Department in Calgary as Assistant General Superintendent in 1947, when he was appointed Superintendent of Engineering Trades at Trail. He is president of the local branch of the Association of Professional Engineers of B.C., and a member of the Engineering Institute of Canada. Mr. Williams is also a director and past president of the Rosland-Trail Golf and Country Club and an active member of the Trail Chamber of Commerce.

Mr. Gautschi was born in Vancouver, B.C. He attended university there, graduating in 1936 with his B.A.Sc. in chemical engineering. He joined Cominco in that year, and in 1937, became as Assayer at Tadanae. Two years later he was transferred to the Smelting Department.

In 1940 he was appointed Foreman of the SO 2 Plant, and then, after a short time on research work, was transferred to Calgary in 1941. He held a number of supervisory posts at the Calgary, becoming Superintendent of the Ammonia Group before being transferred back to Trail in 1943, as Engineer, Projects. In the next year he was appointed Superintendent of Engineering Services. Mr. Gautschi is immediate past president of the Trail Chamber of Commerce and is a vice-president of the Trail Branch, Canadian Red Cross Society. He is on the board of directors of the Trail YMCA and is also active in church work.

Mr. Piper was born in London, Ontario, and graduated from the University of Alberta in 1928 with the degree of B.Sc. in chemical engineering. He joined Cominco in the same year as an Assayer. In 1929 he was transferred to the Smelting Department and in 1937 was appointed Shift Superintendent of the Lead Furnaces. In 1940 he became General Foreman of the Zinc Roasters. From 1945 until 1948 he served as Supervisor of Labor, returning to the Smelting Department as Assistant Superintendent in 1948. He became Acting Superintendent, Smelting Department, in 1951. Mr. Piper is a member of the Canadian Institute of Mining and Metallurgy.

the Association of Professional Engineers of B.C., and the American Institute of Mining and Metallurgical Engineers. He has served on the Town Planning Commission. Mr. Piper has also done much to promote youth hockey and baseball and has been active in the Rosland-Trail Golf and Country Club for many years.

**Fail To Win Car  
In Bellevue Bingo**

Contestants failed to win the 1954 Dodge at the Bellevue Bingo. Mrs. Ken Morley, of Fernie, taking home an automatic dryer as

consolation.

Other prize winners were:

1. Mrs. George Wolfe of Home-dale, Idaho, Ladies Luggage.
2. Mrs. J. Kubin, Bellevue, Mixer.
3. Tony Czeckzo, Blairmore, Fishing Outfit.
4. Pete Potts, Brocket, mystery prize, Lamp.

# Got those cost-of-living blues?

Most people seem to have them  
these days. Prices have gone up

and up...food, housing, just about  
anything you can think of.

But gasoline has tried hard to keep  
its feet on the ground...and with

some success...Because while

wholesale prices in general are up 119%...

more than double what they were

before the war... Esso gasolines

across Canada are up only

42%...about a third as much

as most other things.

### Courteous Driving Is Safe Driving

Courteous driving is automatically safe driving. People who will step aside to let another go ahead through a doorway, will not give an inch to another car on a crowded highway. Many drivers have two personalities - unfortunately, the best one is often left at home when a motorist takes the car out of the garage. Nice people can change into frightening monsters when they get behind the wheel of an automobile.

"It seems that in every situation except behind the wheel of a car, the polite individual considers it a privilege to step aside for others to pass," said Harry Duker, Chairman of the B.C. Automobile Association Traffic and Safety Committee. "These drivers when out of their cars will tender the niceties so necessary to good fellowship and good citizenship. These things are done automatically because they come naturally. But what comes naturally, in any other phase of day-to-day activity, seems too big an effort once a driver steps into his car."

Observe the following B.C.A.A. suggestions, for courteous driving is safe driving.

- 1) Yield the right of way to other drivers, and to pedestrians.
- 2) Share the road by driving in the proper lane.
- 3) Allow plenty of clearance when passing.
- 4) Always signal what you are going to do.
- 5) Give the motorist at a busy intersection a break - stop to let him through.

"Courtesy is contagious. Think of others when driving and be safe," said Mr. Duker.

### Appointments At Cominco

TRAIL, B.C. - Senior appointments in the Metallurgical Division of The Consolidated Mining and Smelting Company were announced today by R. D. Perry, General Manager. J. H. D. Hargrave has been named to the post of Superintendent of Development, Metallurgical Division. E. A. Mitchell has been named Superintendent of the Smelting Department, Metallurgical Division, succeeding Mr. Hargrave and J. D. Hartley becomes Assistant Superintendent of the Zinc Department, the position previously held by Mr. Mitchell. Mr. Hartley will be acting as superintendent in his new capacity. The appointments became effective June 1.

Mr. Hargrave was born in Medicine Hat, Alta. In 1925 he obtained the degree of B.A. at the University of Alberta and in 1928, graduated from McGill University with the degree of B.Sc. in Metallurgy. Mr. Hargrave joined Cominco in 1928 as an Assayer. He was appointed Slag Furnace Shift Boss in 1930 and, in 1936, became Assistant Foreman, moving up to Shift Superintendent the same year. In 1940 he was appointed Assistant Superintendent, Smelting Department, becoming Superintendent in 1946.

Mr. Hargrave is a past chairman of the Trail branch, Canadian Institute of Mining and Metallurgy and is a member of the Association of Professional Engineers of B.C. He is Vice-President of the Trail-Tadana Hospital Board and an active Rotarian. Mr. Hargrave is interested in curling and golf.

Mr. Mitchell is a member of the Canadian Institute of Mining and Metallurgy. He is interested in curling and golf, being President for 1953 of the Trail-Rossland

Golf and Country Club.

Mr. Hartley was born in San Francisco, Calif. In 1927 he obtained the degree of B.A.Sc. in chemical engineering at the University of British Columbia. Mr. Hartley joined Cominco in 1927, becoming an Assayer the same year. He was then transferred to the Research Department and, in 1930, became Assistant Superintendent, Zinc Tank Rooms and Melting. From 1934 to 1938 he held the post of Acting Superintendent, Zinc Tank Rooms and Melting, and became Superintendent in 1938. In 1946 Mr. Hartley

became Superintendent of Development, Zinc Department. He held several other posts in the Zinc Department before becoming Special Assistant to the Superintendent, Smelting Department, in 1951.

Mr. Hartley is a member of the Canadian Institute of Mining and Metallurgy and the Association of Professional Engineers of B.C. He was on the Chamber of Commerce Council for a number of years and is an executive of the Trail Curling Club. He is president of the Trail Memorial Building Society.

### Ravens and the Readymades Split Games

Coleman Ravens are breaking even so far in the junior baseball league, splitting a double-header with Readymade at the eastern centre last week. Ravens took the opener 6-2, dropping the second decision 7-2.

In the winning contest Rypien allowed five first on balls, struck out 12 and registered three wild pitches, while Buzzard of Readymade tallied five first on balls,

struck out 10. Makowichuk, Zembiak, Kryczka, Tymchyna and Kuchyn scored for Coleman, and Yanosik and Giachetta for the Readymade.

In the second contest for Coleman, Smith allowed one first on balls, and Tymchyna one, Smith struck out 5 and Tymchyna 4; Miller fanned 8 and had 6 first on balls for Readymade. Runs for Readymade were scored by Doran 2, Buzzard 2, Miller and Hranoc Coleman scoring was done by Jenkins.
